FIRE SCIENCE PROTECTION TECHNOLOGY

FIRE SCIENCE PROTECTION TECHNOLOGY

OVERVIEW

The Occupations Firefighter, Fire Inspector, Fire Chief

About The Occupations

Firefighters respond to a variety of emergency situations in which life, property, or the environment are at risk, such as residential structures and businesses. Firefighters are frequently the first emergency response team at the scene of an accident. They help protect the public against these dangers. Today, firefighters respond to medical emergencies, and their departments require them to have training in medical emergency procedures. Firefighting is dangerous and complex work, which requires the firefighters to work as teams.

Firefighters must respond immediately to emergencies, and each situation presents a unique and challenging experience. Superior officers, such as a captain or chief, guide firefighting teams to accomplish specific duties. Today, firefighters assume a wider range of responsibilities, which require the utilization of sophisticated equipment. They can expect to operate a pump, position ladders, and connect hose lines to hydrants. In many cases, the firefighters will change duties several times at an emergency scene. Ambulances, fireboats, and emergency rescue vehicles may be operated by some firefighters. Fire stations have dining and sleeping quarters to allow the firefighters to respond to emergencies 24-hours a day. Between emergency responses, the firefighters conduct practice drills, clean and maintain equipment, participate in classroom training, conduct fire inspections, conduct demonstrations to the public, participate in fitness training, check building plans, and inspect fire escapes. Firefighting is hazardous work resulting in environments where floors suddenly cave in, walls topple, and there is exposure to gases, chemicals, and smoke. Firefighters face dangerous situations where injury and death are a risk.

CAREER OUTLOOK

WORK ENVIRONMENT		
Employers	 Municipal fire departments Industrial manufacturing plants Government agencies Forest protection agencies 	
Typical Schedule	 Shift work normal; 24 hours on duty Overtime normal Tools and Equipment: Protective clothing Building and fire codes Chemicals to put out fires Emergency rescue vehicles Firefighting apparatuses 	
Tools and Equipment
